Bapuji at Krishn

~~1938~~ All 3-9

To-day at 9. Sastri came here and asked me to come with him outside. But I being engaged in tuition declined his offer and he went away. At 10 I started from this place and while going near the Lawsdown Bazaar I met A. M. Krishna moor they with whom I went up to the Exhibition Grounds. There he met some body (perhaps some of his colleagues) and with them he went away without taking leave of me. I traced my steps backwards, came to S. L. R's house and gave to Kaveramma Jayanti's September issue. Then I went to Srikrishna's room where he was. He told me that he had got S.S.C. or Scholarship of 180 Rs (Rs 22½ per month) and he had already got 45 Rupees). I was glad to hear this his good fortune. At about 11.30. I came away from his room went to Viswanath's hotel got my meal and came back to my room at about 12.

28th September 1938 Wednesday

This morning at 9, I went to Sastri's house and with him went up to the Neware market. While going I gave the form or loosened "personality" of R. Jagore, ex-governor to Oranimal to get it bound the charges being settled take 0-3-0. Mrs. Sastri had a very large parcel to be registered, but the size of it (too little) made the same impossible. Entering Andra Bhawan we spent 1-2-9 for (Idli, Suppa, Palya & coffee x 2). Coming back to Room at about 10.30 I had my meals at 11.

At 3, I set off from this place to Ramachandra Bhattacharya's house room. Though he was in his room there were two others, and their presence made it impossible for him to set instructed. Remaining there up to 4.30 I went to the Union - where spent 0-1-9 for ~~some~~, ~~books~~ given in the Union Restaurant. In the reading room I remained till 5.30 reading Indian Express, Tarnado etc.

Then I straightway came to the Institute, where I met Sastri too. There our instructor Venkatesubrah being absent or not yet come once again I went with Sastri to Andra Bhawan and had my coffee - the coffee & ghee cake. Then we came to the Institute and the teacher (L) being present went through our usual course of exercise. At about 6.55 we finished our exercises, and I came to J. B. N's and he went to his

house, carrying his bicycle with him. In T. L. 218 house, they were waiting for the arrival of Shenniga men who failed to come. So the supper was late, as late as 8.50. But I got on a jukka near the Square and came to my room just before the lights were switched off at 9. I saw + 56 to the city: 2500/- man given to Madhavarannan
Jayakaravata 29th September 1938 Thursday.

This morning at about 5.30 Subramani came here on no business. At 9 I started from this place — went to Sastri's found that he was not at home, went to Rayavayeswari, ate 'Vade' & 'Dose' — drank coffee. (0-1-0). Then I went up to the market. I got the boring book 'Personality' from Manmohan and paid (0-3-0). Then I went to Srikrishna's and got from him my 'WORK', and remained there only for 5 minutes — went to the market, bought 500 rupees (0-0-5) then leave back at about 10.10. Near the market while going I met Sastri with somebody (an unfamiliar & unorthodox figure) —

"At 12 or so, I went to Dr Kenneth's office PA Ray

Very hot day. I visited my old school, now known as Government Model School, now under the charge of Mr. D. S. Chatterjee. He is a good teacher. I also visited the West Bengal Students Federation Conference. It was held at Barrackpore. There were 250 students. The conference was presided over by Mr. D. S. Chatterjee. It was a very interesting meeting.

Visited the Government Girls' High School and Government Boys' High School.

Left home to Banking Institute.

Chandrasekharan, K. On the theory of the Raman effect. Proc. Indian Acad. Sci. 30, 135 (1947).

✓ Parkinson, Robert (1971)

What would have been the effect of a particle moving in a rotating frame of reference? Suppose the particle has velocity v , the velocity of rotation is ω , the radius of rotation is R , the mass of the particle is m , the charge of the particle is q , the magnetic field is B , the dielectric constant of the medium is ϵ , the dielectric constant of the particle is ϵ_0 , the density of the particle is ρ , the density of the medium is ρ_0 , the refractive index of the particle is n_0 , the refractive index of the medium is n , the angle between the direction of motion and the direction of rotation is θ .

6. Angular momentum and the Raman effect

Let us suppose that the particle has angular momentum \vec{L} and linear momentum \vec{p} . Then the total angular momentum of the particle is $\vec{J} = \vec{L} + \vec{R}$ where \vec{R} is the position vector of the particle. The total linear momentum of the particle is $\vec{P} = \vec{p} + \vec{m}\omega \times \vec{R}$ where \vec{m} is the mass of the particle.

Now let us consider the effect of the rotation of the particle.

Now,

As $\vec{L} = \vec{r} \times \vec{p}$

we have $\vec{J} = \vec{r} \times \vec{P}$ and $\vec{P} = \vec{p} + \vec{m}\omega \times \vec{R}$

Tuesday after the man ~~had~~ got ready to take off so that my party

At a distance from his house, one had a telephone from

met Sastri who gave 10 rupees to me (to be given to Sridhar).
After the exercises were over I gave my fees to the Tutor
and while coming back was thinking of going to the "Foyer"

and Bhawan we had Magalakalya and cold drink
both meeting at 3.9. Then we caught ticket

imagination - the first - the other, Mihail Kirov's book
is also very well written. Standard. When I saw
that he is fit for his work, the goodness of his principles
and the intensity of his feeling for one future goal, I was
convinced that they are great writers). Nevertheless,
my personal benefit. It is. Dredher was not in

Writing my letter from to M. P. H. S. had them think me right to
make for V.P.P a school therapy.

Spent in the afternoon at 4-30 and because my car is
broken down there is no car to ride. So I am taking a walk
down library and to the public library and reading.
Before 11 I am going to walk around Central Park and
then go to the grand central station by bus and come
back to the hotel.

15th Nov. 1938 Thurs.

Another good day again about Central Park
and the grand central station and the city
library. (I am not reading much)

On the morning I went to the
Central Park bus stop and took a bus
(Bus number 64) to the 14th street
and then took a taxi to the grand central station.

17th November, 1937, Sunday.

I start from this place at about 7.30. Dr. Jay kept me home at 7 q owing to some cleaning work carried on in the office. While going I went to the deposit between and had book for Constitution. I saw what I was to read & to do there and remained working with him till 11.30. Then I had to the hotel and had dinner and came home before 12 A.M.

I start from the house at about 7.45 and went to the station taking the train there. In trying to go to a party (Constitution) I went down to the Union. There seems to know that there was a lecture by K. M. Drahakar at 7.30 P.M. I read or ~~at~~ that there were various talks (very notable), National War Memorial, Constitution, Glenn L. Gray, Richard, etc and came to add a student & those with him as against the others when the lecture. Constitution has presented only the history of the country, a small nation, and especially, simple in language which is the very characteristic of the country. I feel it is a good one.

Then I went to the station and took the train to Delhi.

high standard of art as achieved in Nekki, Provence

represented well - is not to his full capacity. - It
is hard to think that he could have acted well
but Arthur's character can't be seen on the
stage. Moreover, his brilliant and abundant
style of the N. Theatre has given little scope for
him & the exhibiting of his talents.

At 5 hrs The play closed and we were
to be conducted by a guide out of the hall. We
had to go through the lobby, ~~the~~ ^{the} stage door and

Spent day at work with E. J. and Mr. G. M.,
& we made some progress. Thanked Mr. P. for
loaning us a 13.7 - and except minor errors -
they seem satisfactory to calculate a 1000
Watt 1000 ohm resistor which would be good
for the 2000 ohm load.

A 1000 ohm resistor consisting of two 500
ohm resistors in series. Description given like
this - two 500 K & Matsui 1000 ohm
resistors in series. I used two 1000 ohm
resistors in series. I think it will be better
but I would like some information about
why they chose 500 ohm resistors.

Morrissey's writing contains plenty of words that
sound like traditional ones and there he reached my heart with
the new death song, but from 15-16 one must be
more concerned. The music and all has not
done justice to the substance content in the
way a person should do it, but I think

January - 20th (Wednesday, 937)

Moderately cool this morning. Feeling a little
tired and not a little sleepless last night.

Starting from the place at 4.50 or so with suit
I was very anxious to be outside "the city" and
afforded "freedom". These two went on — with the
institute, I hope. But think I should enjoy my
"sovereign" right of liberty. Meanwhile,
with him I went to the "Sports Hall" where ~~the~~ ^{his} ~~now~~ 2nd ^{2nd} in class my son ~~is~~ ^{has} now
done. He beat me 7-3.
Then I went to the "Krisus" restaurant
for we were 24 hours

Leaving Saville's about 10 and told him that I would
not want to buy a house he would buy it the
at once. His family is two parents and he said
he could not get out of the city but at this time
it was 165 and we both were closed. So he came
back and I told him we had offers to buy
the house and I had to tell him so.

Monday

31st January 1931.

This morning, starting from the place at 10.30 I went

In the afternoon having a day out and again against life
and death went to the telephone office and paid off the bill,
and returned by 2.30.

I received his up to £1.15 : Then to withdraw
£100.00 and brought it to Mr. H. H. Miller's office
from the telephone boy Brooks.

Started for that place at 3.00 because it was the man
who I have got for bills, from which
spent one day you could withdraw
in the same place.

Finally my card at 3.00 withdrawn
the £100.00. Within his, all £100.00 taken

as the inevitable enemy of the future youth and of
the C. I. C. They also note that the role of business,
a blind man of the setting, high minded and
generous, but because kept outside by the
village's foolish policy they have been com-
menced on the high road leading to
spiritual deterioration. The extra role of the post
is Pratibha, notably Pramadabhi, more so than
the boy heart-wondering on the path of travel
in seeking after the love of Atma, notably such
youths as our son — the boy who has been
born from and without mother or birth and
to be as a tree without earth for her

met me.

We say law will end yesterday with this letter if you
fail to sign on the 24th and 22nd of March 1935.

Morning passed. At 10 A.M. Mr. Giffard
brought me and Captain I went to the British Embassy
to him earliest letter of 5th, + coffee.

Then to his room where I remained until 1 P.M.
and they have.

At 1 P.M. at 3rd or 3rd started from this
room, walked to British Embassy and had coffee + cigarette
etc. Then to Tel. dep't. the 2nd and had
lunch there.

After this I approached the Foreign
Minister and after the necessary talk
I returned to Giffard and I promised at the
morning by Captain's permission.

The next day I went to the 5th and 23rd
and handed over the following to General
Giffard, soon and downing with him,

which was excellent. In writing from Oxford
days - you will remember (poetry and French and
through a play with the same captain of field golf
and theatrical training - the very best) - a good
table & a meal from a celebrated cook -
the Duke of Cambridge - (the poet is now in
the army) - very anxious to be a soldier
at a very young age and his son to be a soldier - he
remained steadily poor. His mother died young
after the birth of the Duke & the wife of his deceased
wife at the Duke's request married him. The Duke
soon became poor and his father's descendants were all
now due to the losses of his profession and fortune.
He was a professor now & in the College and he and his
brother, who was a boy, used to call it "Papa's place"
(Hogarth's) (see Hogarth, London) home in the garden
where they conducted their studies. On the continent
he or his brother frequently came to England
and because of his old age, infirmities and
constant illness with his wife died (Mrs. General
Maitland (General Maitland)) this being later a great
disorder in the family and probably the
old man had always wished to his wife

However with going over somewhere else
in the locality of Quincy after breakfast I went to the
military academy there. On my way there I saw many
of the same music and song - the soldiers mostly - who had been
in Porington's house - while O'Malley was still there.
From now on he had - and the song - the soldiers
now as she went she would hear the士兵, & &
before I came to hearing this song I used to
remember the music in the other houses and say to myself
to and the music on a blind call a certain rich
old lady in his house. Mrs. Porington, she was a peasant
and used to talk with her but Porington's orders
he suffered of the party and dancing. That was before he
had any wife to the house. She wholly respects the old
man who helps another words "grandma" and
she is mainly bearing with the work for him
I am reinforced here who went to the
house of O'Malley also. In the very next day during
O'Malley's absence the song on the soldiers will be
the work by the spirit in her house and the
old man the soldier, Mrs. Porington, she was a

length all had laid and they got married. Another

The play is "Lover," followed next by "The Girl in

earliest work I did writing but for the surface action of the
play - here and here, which shows something of what I
do for the audience when I am writing screenplays if
they always have to stick to the strict formula. That's
also how I wrote the "Silent Pictures" in, after I'd been
out of the country quite a while, I got interested again
in writing. At first all the stories I had in mind were
of the particular sort I mentioned that were only
about women. And so I began writing the stories
about women. And the wife and her father meets the
man in a restaurant and has her heart somewhere not
immaculate forever with the man. And the story
is told in a very simple way, and the story goes that

Very interesting film, Industrialism and the Working Class. A superbly educational film, + an excellent opportunity to understand the social system, especially its class -

Conservative world, now more conservative,
now less conservative, now more conservative, more less conservative, more less conservative.

But I don't think it's any good to think of
it as conservative or progressive either. The only
real test of social progress is material progress
in the working-class community. Material progress
